Cristian Ramirez

FULL-STACK DEVELOPER

cristiandanrave@gmail.com · linkedin.com/in/cristian-daniel-ramirez-vega · github.com/CrixxCode
cristianramirez.up.railway.app · Available for remote work

PROFILE

Full-Stack Developer focused on building web products end to end: requirements, architecture, data, backend, frontend and user experience. My primary stack is Django + Angular, with professional use of ASP.NET Core/.NET and React, and fundamentals that let me adapt to different technologies.

EXPERIENCE

Junior Full-Stack Developer

September 2026 - Present

Universidad de La Guajira · Vice-Rector's Office for Teaching · Independent contractor

- Development and technical evolution of the Ejercitador Saber Pro platform on an existing codebase (Django, FastAPI, React, MySQL).
- Functional and technical QA, cross-module testing and bug fixing.
- Refactoring components of the existing architecture.

Junior Full-Stack Developer

June 2026 - October 2026

ALGORITHM S.A.S. · Independent contractor

- Building backend features with ASP.NET Core/.NET and frontend interfaces and flows with React.
- Designing and consuming REST APIs and integrating third-party services and APIs.
- Gathering and refining requirements; supporting interface design and user experience decisions.
- Functional QA, cross-module testing and bug fixing; took part in the full development cycle of a multitenant accommodation booking application, in testing when the contract ended.

Student Tutor

2022 - 2026

Universidad de La Guajira

Academic support in programming fundamentals, algorithms, data structures, databases and web development.

FEATURED PROJECTS

Wayra Travel

Testing phase

Multitenant hotel management SaaS, built in a two-developer team: requirements, architecture, data, backend, frontend, RBAC, multitenancy, testing and deployment.

Django · Angular · PostgreSQL · Docker
wayra-travel.com · github.com/CrixxCode/wayra-gh

Sky Beauty Maquillaje

Testing phase

Online store with checkout without an account, orders over WhatsApp and an admin panel, built solo for a client: requirements, data, API, frontend and automated tests.

Next.js · NestJS · PostgreSQL · Prisma
github.com/CrixxCode/sky-beauty-web · Video: youtu.be/a73Mkd9Z-II

EDUCATION

Systems Engineering

2022 - Present

Universidad de La Guajira · Tenth semester · Expected graduation: first half of 2027

Systems Technician

2020 - 2021

SENA · Completed

STACK

Backend
Django, **Python**, ASP.NET Core / .NET, C#, Node.js, Java

Frontend
Angular, **TypeScript**, React, JavaScript

Data
PostgreSQL, MySQL, SQL Server

Tools
Docker, Git, Postman, WSL, Railway

Primary stack in bold

CONCEPTS

REST · RBAC · Multitenancy · Modular monolith · Clean Architecture · MVC · Relational design

ACHIEVEMENTS

- 1st place — Programming Marathon (2023)
- National Top 10 — Hackathon Colombia 5.0 (2026 · Bogotá)
- Saber Pro: overall score 188 · English 181
